## Need New Heating Equipment? We Can Help!

Okay, so your system is a hundred years old and you want to get a new system that will use less fuel, but you don't have all the money right now to get the system updated before winter is here again. We have a solution for you with financing at good rates from a couple of sources.

Remember, too, that we are now selling, installing and servicing the full spectrum of propane-related heating appliances and heating systems. New propane hot water heaters, supplemental heating equipment, new furnaces and boilers are all great ways to

save on your energy costs throughout the year.

In addition, you should look into the availability of grants and other resources that may help offset the cost of updating or replacing your heating system. On the back of this page we have listed the most recent programs to help you get a better understanding of the available resources.

Lastly, the best heat installation technicians in the area are part of our talent team of heating professionals- so you will always

get the best job and the most for your investment in new heating equipment.

Give us a call for a complimentary estimate, and to find out more about the ways in which we can update your equipment and start saving money!

Visit the following link to learn more about the benefits of upgrading your system:

## Protection Plan 1<sup>st</sup> Time Enrollment Savings

For a limited time we are offering enrollment in our Heating System Protection Plans as an incentive to save money on your energy budget for this upcoming season. Each plan includes an annual tune-up and service on your heating system, plus parts and labor coverage for most of your heating system components should they fail at any time during the coverage period. First-time buyers of our protection plans can save the following:

### Classic Protection Plan

- 100% coverage for listed parts and labor to replace during normal working hours

*Regular Annual Fee \$209*

**Introductory Rate \$159.00**

### Premium Protection Plan

- 100% coverage for listed parts and labor to replace 24 hrs/day, 7 days per week

*Regular Annual Fee \$269*

**Introductory Rate \$219.00**

# Current Energy Grants and Incentives

## Various Grant Programs Available for Homeowners

As of August 1, 2010 the following resources are available to assist home -owners seeking to upgrade or replace heating equipment:

### Heating Oil & Propane Equipment Programs:

- [NH Home Heating System Rebate Program](#)  
New Hampshire Office of Energy and Planning received approval from the federal government to offer New Hampshire residents incentives for the purchase and installation of high efficiency home heating systems and/or domestic water heaters. This program provides rebates for *replacement installations* of high efficiency home heating systems and/or water heaters in existing homes for current New Hampshire residential electric, propane, oil and natural gas customers. To be eligible you must purchase, install and operate a heating and/or domestic water heater that meets all applicable efficiency requirements. See [www.nhsaves.com/HeatingRebate](http://www.nhsaves.com/HeatingRebate) for more details, or call our office at (603) 356-2411.
- [Energy Star Rebate Program](#)  
Federal tax credit is available to consumers who install high-efficiency propane heating systems, as well as certain high-efficiency oil boilers. 30% of the cost of the installation up to \$1500 is available in the form of a tax credit for qualified systems. (see link below)  
[www.energystar.custhelp.com/cgi-bin/energystar.cfg/php/enduser/std\\_adp.php?p\\_faqid=5786](http://www.energystar.custhelp.com/cgi-bin/energystar.cfg/php/enduser/std_adp.php?p_faqid=5786)

### Alternative Energy Equipment Programs:

- [Residential Central Wood-Pellet Boiler Rebate Program](#)  
During the first week of July the New Hampshire Public Utilities Commission announced a new rebate program aimed at helping households in NH to convert from traditional fossil-based fuels to renewable, cleaner-burning and regionally produced wood pellets. The program offers a generous 30% rebate up to \$6000 for investments in residential high-efficiency bulk fed wood pellet heating systems. Our central wood pellet heating system, called the AutoPellet, is fully qualified for the rebate. See [www.puc.nh.gov/Sustainable%20Energy/RenewableEnergyRebates.htm](http://www.puc.nh.gov/Sustainable%20Energy/RenewableEnergyRebates.htm) and call us today to learn about this exciting new program.
- [Federal Tax Credits for Biomass Stoves – Wood Heat & Wood Pellet](#)  
The Government has a powerful renewable energy incentive designed to reduce our reliance on foreign oil and increase clean, efficient home heating with wood logs and pellet fuels. The stoves must have a thermal efficiency rating of at least 75% as measured using a lower heating value. Most of the appliances that we carry qualify for the tax credit. See [www.energysavers.gov/your\\_home/space\\_heating\\_cooling/index.cfm/mytopic=12570](http://www.energysavers.gov/your_home/space_heating_cooling/index.cfm/mytopic=12570) for more details, or visit our showroom to see the latest biomass appliances that qualify for the tax credit.
